ANMOL PATEL

Aspiring Data Scientist | Machine Learning | Python

Portfolio | anmolkpatel42@gmail.com | +91 87808 52020 | LinkedIn | GitHub | YouTube: @AnmolPy | Vadodara, Gujarat

PROFESSIONAL SUMMARY

Final-year Computer Science student with hands-on experience building end-to-end Machine Learning pipelines, from data cleaning and statistical analysis to model training and deployment. Skilled in Python, database management, and data-driven problem-solving. Seeking entry-level **Data Scientist** / **ML Engineer** roles.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2023 – 2027 (Expected)
Parul University, Vadodara **CGPA: 8.4 / 10**

TECHNICAL SKILLS

Programming	Python, SQL, C/C++
ML & Data Science	EDA, Feature Engineering, Regression, Classification, Ensemble Methods, Cross-Validation, Hyperparameter Tuning, Association Rule Mining
Libraries	NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Flask, Joblib
Data & Cloud	MySQL, MongoDB, AWS, Oracle Cloud (OCI)
Tools	Git & GitHub, Jupyter Lab, VS Code, Render
Familiar With	TensorFlow, PyTorch, Power BI, Tableau

PROJECTS

Resale Car Price Prediction Project Flow | Code

- Built an ML pipeline on **15,411 car records**, covering cleaning, EDA, and feature engineering.
- Compared four regressors and tuned Random Forest using RandomizedSearchCV, achieving **R^2 of 0.94**.
- Exported the trained model and preprocessor using Joblib for reuse.
- *Tech Stack:* Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Joblib

Holiday Package Prediction Project Flow | Code

- Built a classification pipeline on **4,888 customer records** to predict holiday package purchases.
- Compared four classifiers using cross-validation and tuned Random Forest with RandomizedSearchCV.
- Achieved **93% accuracy** and exported the model and preprocessor using Joblib.
- *Tech Stack:* Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Joblib

NextFlix – Movie Recommendation System Live Demo | Code

- Built and deployed a Flask-based movie recommendation system using Apriori.
- Generated recommendations using Support, Confidence, and Lift metrics.
- Developed a web interface for interactive movie recommendations.
- *Tech Stack:* Python, Flask, Pandas, Apriori, HTML, CSS

WORK EXPERIENCE

AI Intern (Virtual) – IBM SkillsBuild × Edunet Foundation May 2026 – Jun 2026

- Applied data preprocessing and exploratory data analysis to real-world datasets in Python and built an AI-based project.
- Trained in core Machine Learning and Deep Learning concepts through IBM's structured AI curriculum.

Data Science Intern (Virtual) – AICTE × MainCrafts Technology Jan 2026 – Mar 2026

- Cleaned, analysed and visualized datasets using Pandas, Matplotlib and Seaborn.
- Applied machine learning techniques within real-world project development workflows.

ACHIEVEMENTS & CERTIFICATIONS

- **Selected Participant,** Parul University Data Science Tour 2026, Hyderabad – Fully Sponsored Programme featuring Industry Visits and Expert Sessions Verify
- **Finalist,** Odoo × Parul University Hackathon 2026 Verify
- **Certifications:** AWS Cloud Foundations (AWS Academy, 2026) · OCI 2025 Foundations Associate (Oracle, 2026) · AI Fundamentals (IBM SkillsBuild, 2026) · Data Warehousing (GeeksforGeeks, 2025)
